APRIL 2009

NON-RYEGRASS PASTURE

Selecting correct varieties to match your requirements and when you need it most, is the key to success.

Kiwi Seed specialises in *Non-Ryegrass* pasture mixes to suit most situation with emphasis on early growth species.

Our seed mixes typically contain **10** species of grass, legumes and herbs. All to *complement* each other and provide *quality grazing* over a longer period than simply ryegrass/white clover pastures. Grasses included are tall fescues, cocksfoot, brome grass, phalaris and timothy, all deep rooting true perennial species.

Legumes include white clover, gland clover, red clover, sub clover and lucernes. Herbs are chicory and plantain.

CHICKEN FEED

KIWI SEED LAYERS MEAL

Mixture of grains, Vitamins and minerals
 10kg or 25kg

CHOOKEN TREAT

A mixture of cracked grain and wheat.
 1kg or 10kg

Second graded wheat. 25kg

GETTING THE LAWN YOU WANT

- **PREPARE YOUR GROUND** approximately 2 weeks before sowing, by clearing weeds and debris
- Even out the ground surface and apply fertiliser and water well
- Rake lightly to loosen surface and ensure surface is even
- **SOW LAWN SEED** at 30grams per square metre
- Lightly rake over with soil to cover seed
- Keep new lawn moist at all time in the first 2-3 weeks. Use a mist sprayer until established
- **DO NOT OVER WATER OR PUDDLE**
- Germination should occur with 7-14 days
 We have quality lawn seed for your individual requirements.

Super Fine Lawn Seed - Extra fine, perfectionists type.

Regular Lawn Seed
 Everyday traditional lawn

Hardy Lawn Seed
 Drought resistant & hard wearing

Tasks for April

- Plant Spring Flowering bulbs
- Start another compost heap. **DO NOT USE DISEASED MATERIAL**
- Plant new fruit trees
- Start preparing a new strawberry bed
- Start sowing herbs to ensure seedlings for spring planting
- Sow broad beans, beetroot, broccoli, cabbage, cauliflower, lettuce, onions, peas, silverbeet and spinach
- Sow now, a green manure crop such as mustard, oats, tick beans or Prima Gland Clover in ground that is to be left vacant through winter.

PRIMA GLAND CLOVER

NEW Green Cover Crop

is suitable for a green manure crop in ground that would be left to fallow over winter. Prima Gland Clover has a high level of insect tolerance and will grow in a wide range of soil PH and textures. It will tolerate mild waterlogging and mild salinity. Flowering generally begins in mid September. Dig in before flowering for organic content or dig in after flowering for nitrogen fixation. A shallow sowing depth is required (max 1cm).
