## Out in the garden

FEBRUARY is fungus month, when lots of leaves and flowers end up with spots and blotches. Reduce the chance of disease by watering at the base of the plant preferably in the morning. We have a variety of sprays to treat various funguses and diseases.

Citrus plants appreciate you taking the time to feed them this time of year, we have Kiwi Seed Citrus Fertiliser available with the correct nutrients to maintain good healthy citrus plants.

Take care too that grass is kept off the base of the plant but maintain a good amount of mulch over the root area.

Save seeds from your best peas, beans, salads, tomatoes and flowers. Self fertile plants like these are easy for the home gardener. Choose plants that crop well, have great flavour and are no fuss. Your own saved seed grows in strength every year, becoming more disease resistant + better adapted to your garden.

Tomatoes should be in full production at this time, so keep them growing well and fruiting prolifically with regular applications of *Kiwi Seed Tomato Fertiliser*.

# FOURFLAX
